Whispers from The Brighter World
A Fourth Revelation

Friday, February 16, 2001 - 10:00 a.m.

Bonds are created from life to life and bring certain beings together without them sometimes understanding the intensity of their relationship. This principle of reincarnation is a basic concept, which was concealed by certain religions that care little about truth. This wheel that turns repeatedly brings back to Earth beings that must continue on a way until they are released from this constraint. An incarnation can take place for the noble goal of helping mankind in its difficult search. These mission-in-charges have to experience all that their brothers must endure. Noble souls are constantly eager to serve; it is their main characteristic.

"Sooner or later Earthmen will have to free themselves from this heavy debt which slows down their evolution.

"The planet Earth continues its evolution according to the rules established. Its complete mutation takes place slowly, though the pace accelerates year by year, imperceptibly. It is true that a new race is being born, which, vibratory wise, will be more harmonised with the planetary context.

"It takes centuries for the positive aspects of this slow rotational movement to be perceptible. Through our way, you are in this upward movement which characterises the beginning of the century."
