Whispers from The Brighter World
A Fourth Revelation

Thursday, March 15, 2001 - 8:00 a.m.

Current medicine is unaware of an important aspect of man, which will only be revealed much later. Not only would this dimension not be understood, but it would also be wrongly interpreted and so would not be helpful to man. The karmic aspect, which is so important, is ignored. There would be much to say on the issue, but what's the point in addressing it since, in the present state of affairs, it cannot be seriously considered.

"The personality of an individual, as a whole, is determined by his karmic attributes: his way of life with all that results from it – his genetic assets, health, character and the resulting behaviours. The channel represented by family, race and social conditions: all that is chosen according to lessons to be learnt in the incarnation. Health is important in this system. It has many interconnections throughout one's life.

"Medicine is very often misleading. It does not consider man as a whole and relates whatever it does not understand to subjective and erroneous causes. It will take a long time to get rid of hasty and easy theories that it contents itself with more and more. By referring all or most of the unexplainable pathological states to psyche, it adopts a simplistic approach without addressing the heart of the actual problem. In a few decades, men having wandered into dead ends will open up to the reality of human beings."
