Rejoice, my daughter! You see how great the faith of the abhyasis is. Your Master's message of the 30th April had a lot of success. You can assess the impact by comments you have received from all sides. Half the abhyasis are ready to receive a good word.

"My son chose the right moment. They have felt the truth, the felicity of his treatment. The last development in France has bound them together in the devotion of this anniversary. Our candidates who are really determined to follow us do not focus on such a slanderous campaign. They know the Mission. It has no secrets, and its practices are as clear as can be. Fervent contemplation has attracted the Grace. It is very pleasant in this kind of gathering. It is permanent, but on some days the expansion of the power is larger, while the hearts, wherever they are, are united in the same thought.

"What is special with this kind of celebration is that they heighten love and faith. We have already expressed ourselves on this issue, but it is good to come back to it. Devotion gives strength. It makes the human being surpass himself, and it can open many doors hitherto unknown to him. Hence the importance of these big gatherings that are characteristic of the life of the Mission, in its boldest and noblest sense.

"May the future allow that they continue to be held in this country."
