Whispers from The Brighter World

A Fourth Revelation

Saturday, May 26, 2001 - 8:00 a.m.

This special communication will be recognised in the future. Earthmen as a whole will have to accommodate themselves to it: it is possible to have contact with us.

"Some beings have this faculty. Why not admit it? This fact always existed and, among some people, it is common and much practised.

"They also possess a wisdom transmitted with the passing of time, lit by guides who are by their sides. All is simple for them; their minds are not tortured, the ancestors protect them. Their way of thinking is different from yours, but it is basically right even if rituals are added to it which have no relevance to our comments.

"Why do your purportedly advanced societies reject what is not codified according to their standards?

"Man's capacities are amazing, but are relatively unused. The moment has not come; the coming era will favour their development. These capacities will have to be used for the good of men: they will have to be handled with discernment. The notion of good and evil will remain and vigilance will have to prevail so as not to go to extremes.

"The evolution on the Earth is taking place slowly, even if it is nearing a pivotal moment when everything can change dramatically and activate the movement.

"Be that as it may, a time of adaptation is necessary for man, who straightaway cannot be subjected to modifications that are too brutal.

"He must transition carefully, and by a phenomenon of osmosis, find himself in an element fostering this metamorphosis."
