Whispers from The Brighter World
A Third Revelation

Wednesday, May 30, 2001 - 8:00 a.m.

As time goes by, you will have evidence of what we tell you. We proceed with caution; hearts are opening up to reality, slowly but in an irreversible way. A new era is dawning on the horizon; highly elevated people are leading the way to knowledge: they are pioneers of this evolutionary cycle. Their conception of life is different from that of the common run of people. These special beings are people of modern times with a mission. There are serious reference books, which can give you a broader idea of our comments. The world is in the making; the dawn of a new day is rising. Keep your mind open, you will need it if you remain on this Earth long enough to witness this ascending movement.

"The shock of ideas will be hard, the old concepts will be disposed of into the bin; confrontations will be inevitable. An important change cannot be achieved without clashes. There will be much wailing and gnashing of teeth – putting things blandly. One cannot revolutionise the world without damages. Remain serene and pray for the advent of a better world. To become a butterfly, a caterpillar goes through difficult stages which your eyes cannot discern. You can only see the result, and things are better that way. Dream of this future world, wish for it with all your soul; you will contribute to its materialising."
