Whispers from The Brighter World

A Third Revelation

Sunday, July 29, 2001 - 8:00 a.m.

A faint light has started to peep through the horizon. The broad lines of future evolution are taking shape gradually. Everything has basically to start all over again. By changing genetically, the race will evolve. The real change must entail this transformation at the human level. One cannot build a world of higher spirituality with what exists currently. The theory of evolution as seen by scientists is not right, because it is strictly limited to the human component, to materiality. Other aspects than those taken into account in this theory are to be considered. The human being must be considered from every angle, which does not boil down to an assembly of cells. By working its way up to a higher level, the planet Earth will carry along the whole creation. Some animal breeds are also at the dawn of this surprising change for man, who in a distant future will have to respect more all that lives and evolves around him. The rule of total harmony won't happen in a hurry, but it is in the making, whatever the thinking of today's man who will have particularly to refine himself, to align himself, with new realities."
