Whispers from The Brighter World
A Third Revelation

Monday, July 30, 2001 - 8:00 a.m.

The picture is: human beings are complicated, sometimes unpredictable in their reactions, and disconcerting. We must try to foresee their likely behaviour; in some circumstances it is better to proceed this way. Human nature is dependent on many external influences, emanating from various elements. The movement of planets plays a significant role in the way of being for everyone, much more than you think. You know that the moon influences the tides and conditions human behaviour; you can find relevant evidence in the development of pregnancies because it is obvious, but you are subjected to many influences of this kind that you have no idea about. Planets interact with each other; things cannot be otherwise. Creation is as one large body whose many elements interfere with each other.

"Your thoughts are powerful waves that defy distances. Be vigilant about all your mental constructions; they condition you and affect your life. Develop yourself harmoniously; root out from this garden – where the good grows in a scattered way, but also the undesirable – all that can harm your progress. Let the best grow inside you. It will make you grow stronger and will constitute a capital likely to foster your spiritual progress."
