Whispers from The Brighter World
A Third Revelation

Friday, August 31, 2001 - 8:00 a.m.

Are we not the evidence that interplanetary exchanges can take place? Modern means of communication can compensate for channelling. Future times will be full of relays of this kind and nobody will see anything wrong with that; the evidence will be there, undeniable. Man of tomorrow will have to adapt at all costs, at the risk of being considered as a misfit emerging from past centuries. In the second half of this century, technology will reach its peak. One will have to follow progress to the letter, to be not too much out of touch. Don't feel afraid of this prospect, you who do not view favourably this proliferation of modern means that will govern your life more and more. Whether you like it or not, you will have to adapt, you will have no alternative. The poor Earthlings limited as they are in their understanding will be more and more astounded. What will become of the spiritual man in this revolution? It is up to you to see and advance in a way that will be of great help to him, by preparing for him solid and friendly facilities that will answer his aspirations on all points."
