Whispers from The Brighter World

A Third Revelation

Monday, October 1, 2001 - 8:00 a.m.

France will again go through very difficult moments, but it will rise from its ashes as it always has. This country already suffered much in the past and it managed to keep some sense of dignity in particularly difficult circumstances.

"Each country has its own history, its character and its distinctive characteristics. A great number of individuals are open and receptive to new ideas and able to adapt to a spiritual movement, which has been the case for Sahaj Marg. It is deeply rooted therein and noble souls are striving to have it firmly established, thus helping many of their brothers. It takes a lot of time to change the world and to move from one cycle to another, without too much damage.

"With the passing centuries, evolution has not taken place smoothly. So many well-off civilisations disappeared, leaving so few memories of their past grandeur!

"People's minds, religions and customs change; man evolves and many beings come out of obscurantism and open to knowledge, that which is accessible to humans. This is already a great step forward. The important thing would be for them to get rid of generally accepted ideas and seek their own truth themselves. Many succeed in this. The blessed era is in the making; let us rejoice for the future of humanity."
