Whispers from The Brighter World
A Fourth Revelation

Wednesday, October 31, 2001 - 8:00 a.m.

It is sad to see so-called 'scientists' issue such remarks and be quoted in this kind of [broadcast] programme. For lack of evidence, according to their criteria, the topic of reincarnation is nowhere near being officialised in your Western societies. People's minds are opening in spite of that and advancing in knowledge.

"The diehards should be given time. It is so sad to live like that, limited to pseudo-scientific facts whereby the very foundations of the rules of life on Earth are ignored. Beings considered as intelligent live confined to a narrow way of reasoning that keeps them in the utmost ignorance of reality. They are advancing in darkness, clinging to their certainties that delay their evolutionary process. The day when the veil of ignorance is raised, these beings will have to learn everything and re-examine their way of living in terms of accepting what they had regarded as entirely imaginary.

"When the Earth has entered a new era, these beings will discover as a whole what they had considered as pure fabrication, and they will be propelled into this world where reality will leave them literally thunderstruck for their greatest good."
