Whispers from The Brighter World
A Fourth Revelation

Sunday, November 4, 2001 - 8:00 a.m.

You all live on the same energy, therefore humans are brothers. What do they do with this very powerful bond that makes them alike? They are not aware of it. And even if such were the case, what would they do? This knowledge would not prevent them from killing each other.

"We always come to the same stumbling block: the race's evolution must continue so that a collective awakening can take place and set in motion a definitive mutation.

"When the shift into another dimension has taken place, everything will need to be reconsidered and man will advance in an unknown land where his bad manners will no longer prevail. He will forget them quickly, trying to adapt as best he can to the climate of this new era full of hope and geared towards the total transformation of humanity.

"You should go beyond your current vision of it. Project yourself into the future by visualising men building strong foundations for an unfailing fraternity that will make this Earth a springboard towards a glorious future.

"In tragic moments, one should not lose hope. Life is prone to spontaneous renewal bound to occur sooner or later. Even if you believe these times are far ahead, keep faith and confidence in the future of this planet."
