Whispers from The Brighter World
A Fourth Revelation

Wednesday, November 7, 2001 - 10:00 a.m.

Reincarnation remains an enigma for man, even in countries where it is granted respect by religions. Other religions preferred to hide it, to confine their followers to a state of ignorance of a fundamental principle of life on this planet.

"The obscurantism maintained on this subject is a hindrance to the open-mindedness necessary for people to easily recognise the existence of serious contacts between various levels of consciousness. The new era that will come on Earth in the future will re-establish the truth; yes, inter-world communication is possible. Some humans have this faculty; many pretend they have it, yet they can only access low vibratory levels and tarnish the beauty of the system – beautiful when it is a contact between higher beings and mediums properly prepared for this work. Since the caveman, humanity has come a long way; much remains to be done to reach the level of ancient civilisations that disappeared when they were at their peak of knowledge.

"That is the way it goes: everything has to be restarted all over again – it is in the nature of things."
