Whispers from The Brighter World
A Fourth Revelation

Tuesday, November 13, 2001 - 10:00 a.m.

Great upheavals are bound to occur on this Earth, at all levels, in terms of the structures of the continents and life existing on them. Humanity as a whole will access a new set up. Man will inevitably change; these future times will give him another dimension. His current status will be completely changed and adapted to the circumstances; the other kingdoms will evolve accordingly. This change is necessary and inevitable. This planet, as a whole, must evolve: this is in the nature of things. All the living are subjected to the same rules, structure wise, and must follow the trend. Man is unaware of these great principles. The greatest scholars have an idea of the truth, without being able to truly grasp it. Real awareness about the great aspects of creation, as well as everything associated with it, is not within the reach of man, however erudite he may be. It will still keep its secrets for a long time.

"The human being, at the present stage of his evolution, cannot penetrate them. He must grow in wisdom to approach them with enough sense of humility.

"When the moment comes, he will open his eyes. Lastly, he will be able to build a new world where humanity as a whole will enter a luminous cycle capable of utterly transforming it."
