Whispers from The Brighter World
A Fourth Revelation

Friday, November 23, 2001 - 10:00 a.m.

At the cosmic level, life is one and indivisible. The planets mutually influence each other, and likewise so do the forms of life existing on each one of them. When we refer to the great divine plans, we refer to the total life of the universe. Creation is programmed in the least details, ranging from life to chaos, unceasingly creating a renewal in the existing structures. Anarchy cannot reign in this huge set up. Human beings are limited to their own perceptions and what they are taught. Yet, despite what they think, the architecture of the universe is very elaborate and harmonious.

"The great architect governs the smallest details. The infinitesimal has its raison d'être and evolves according to its own laws.

"This mechanism is scheduled perfectly, which can seem amazing to man in his smallness since he cannot assess its true worth.

"No matter what may happen, be assured that nothing is done in an anarchistic way; the finger of God manifests itself in everything."
