Whispers from The Brighter World
A Fourth Revelation

Tuesday, November 27, 2001 - 8:00 a.m.

Do you believe that if we were not satisfied with your service, we would continue to give you these messages? You are doing your level best and we appreciate it, we have said it enough. It is not easy for you, given your condition of health, to stand always available for this work. It is nevertheless as we expect it to be.

"Life is a ceaseless struggle. Without the will to act, the human being is overwhelmed; he lets himself go and sinks into a sad state of inertia synonymous with a serious pathology. Being more or less active, man must face his destiny. He is caught up in this spiral and cannot escape from it. Creation is movement, life is movement, and this repetition makes it powerful. In the eyes of men, it may seem to stop, whereas it is only transmuting and taking on a different direction, while carrying on in a different framework.

"Life never dies; it changes and it evolves according to a precise plan which nothing can disturb.

"The established order is immutable; rest assured that when you close your eyes to this world, they will open to other realities, which will keep surprising you."
