Whispers from The Brighter World
A Fourth Revelation

Thursday, December 13, 2001 - 10:00 a.m.

his beginning century must witness the dawning of a new era when many human beings will open up to knowledge. Things cannot be otherwise. Humanity regressed over the centuries, caught in the trap of false theories, of ideas diverting man from a reality which can no longer be ignored indefinitely.

"A hold on people's minds reduced them for too long a time to a system of thought that was purportedly exemplary.

"The evolution of this planet and its occupants is following the same pace. It is going through periods of stagnation, or even of regression, only to set out again afterwards, having let the outcome of its experiences decant itself and having taken stock of the result obtained. It is logical: it takes time to appreciate the appropriateness of an operation. In this world, everything is slow, as it is bogged down in this torpor inherent in its vibrations.

"Humanity is evolving very slowly; the only thing that matters to us here is its spiritual progress. Progress as assessed by men is not determining in this context; it can even divert them from true values."
