Whispers from The Brighter World
A Fourth Revelation

Saturday, December 29, 2001 - 10:00 a.m.

Doctors believe they know it all; actually, their interpretations are often erroneous. They cannot understand your personality and they minimise what you are experiencing in your physical body. One should not hold it against them. How could they understand? In a way, you are exceptional. My daughter, you will have to put up with this until the end. You must find some consolation in thinking that we know what you are going through, and this is no new situation for you. Many human beings go through this martyrdom; they are misunderstood by their circle and especially the medical community.

"Channeling entails tiredness, but it does not justify all that you must endure. The latter is due to factors which are not necessarily detectable according to the current criteria of medicine referred to by those who practise it. They have to learn a lot yet to be able to understand the human body in its reality.

"My child, forgive this incomprehension towards you; it hurts you, but you must carry on regardless of the mistakes of doctors who believe they are infallible.

"We know that this helps you on your long and painful path."
