Whispers from The Brighter World
A Fourth Revelation

Sunday, December 30, 2001 - 9:00 a.m.

Your body is as it is, but it serves you in spite of everything. There is nothing you can do about it, you only have to adapt to the circumstances. Isn't the main thing to succeed in doing what we expect of you? We linger on your case and you do not appreciate it, but sooner or later, each one will be able to recognise themselves in you; humans are equal in the face of physical and moral sufferings and the resulting feeling of helplessness.

"We expressed ourselves enough on the shortcomings of medicine and the incompetence of certain practitioners who deliver peremptory opinions which the suffering patient cannot easily accept.

"Medicine improves on its mistakes; it is advancing step by step by trying to address the problems that arise.

"The time will come when the veil will be raised on the great mystery of creation and the functioning of the human body.

"The current approach to it is basic, and, shall we say, derisory compared with reality!

"A great truth remains to be discovered, which will revolutionise the medical sector, for the greatest good of many patients.

"Patients will have to remain as such for a long time yet, as the time has not yet come for people to be enlightened on how they can be liberated/freed from suffering."
