Whispers from The Brighter World
A Third Revelation

Sunday, February 3, 2002 - 10:00 a.m.

It could happen to you to be in a situation where you or people in your circle could no longer access the physical means of communication. What would you do in that case? Would you let your doubts get the upper hand or would you take into account the pieces of information you would receive through this channel? This possibility should be considered; anything can happen. After all these years of practice, you have been given a lot of evidence of the credibility of the system. Therefore, you should never minimise the information you are given through this means; it is reliable and not subjected to the interferences that prevail in the lines of communication, which will occur more and more. This way of communication is not accessible to all. It will be so when men's perceptions have sufficiently developed – these ones as well as others – owing to that they will no longer be limited to their current poor truth on the worlds surrounding them. They cannot see them, nor can they communicate with them, in spite of this technology that they believe is revolutionary. It is only a mere means that does not take into account the amazing capabilities of the human brain, which, at the moment, men are not fully aware of, nor are they aware of the possibility of making use of them. Humanity will have to wait until it reaches a higher stage to fully benefit from these capabilities."
