Whispers from The Brighter World
A Third Revelation

Sunday, February 10, 2002 - 10:00 a.m.

Yes, humanity is in the making, that is not new, but the movement is accelerating. This planet suffers in many respects. Men tamper with it, disturb it and do not respect it any more. That has become worrying; the problem is serious, and in the present state of affairs, the process is irreversible. No reasoning or warning statement will stop these mad acts that are serious for the balance of this world. Men suffer from it as much as the Earth, and they are not really aware of the drama that is taking place. All these harmful effects disturb important functions of the human body. The nervous system is particularly affected, which will bring about more and more disorders. Reason alone will not stop this trend; men's lifestyle, especially in the industrialised countries, will not change towards reverting to normality. Man is caught in this spiral, and he finds it natural to continue to live like that. This civilisation will destroy itself because of its excesses of all sorts. The cries of alarm are useless; they are stifled by profit which leads the world and which conditions its actions. Only spirituality remains as a sure value; its effects will persist well after this dreadful civilisation is destroyed."
