Whispers from The Brighter World
A Third Revelation

You all can rejoice; the Mission is truly soaring in India and this phenomenon will extend to the world, when time comes. India is the spiritual heart of this planet; its radiance intensifies with what you call globalisation. In the present state of affairs, it seems to get lost in the manifestation of an exacerbated materialism, but all has its limits; going further in this dangerous escalation is worrying for humanity.

"A time will come when other values will become the recourse of souls in distress. There are cycles and modes that prevail, but what do they lead to? Do they make men happier or, at the very least, conscious of the purpose of their incarnation? Far from that.

"This civilisation overloads man dangerously. All his senses suffer from the excess of images imposed on him, from noise that unsettles him without him even realising it, and from a lifestyle by and large different from what it should be.

"The wise men protect themselves as much as they can, but they are caught in this process and they do not escape the collective harmful effects, which among other things, do not contribute to the life of a mystic."
