Whispers from The Brighter World

A Third Revelation

Saturday, March 16, 2002 - 8:00 a.m.

Yes, there are millions of planets in this galaxy that resemble the terrestrial sphere. This comparison should make the small man humble, so full of himself and of the uniqueness, which he attributes to the planet he is living on. His knowledge is very limited and inaccurate regarding the size of the universe. The Earth is a mere incident in this great work, and he – in his human nature – is only dust meant to return to the Earth. Only what remains of him is integrated in a boundless and endless process, because it is of a vibratory and divine nature. All that is refuted by science concerning the reality of man's subtle bodies, keeps its integrity and its true interest.

"Life does not end with an incarnation, which people with open minds know and they understand that it is possible to have a communication system between the worlds.

"The advanced man has a presentiment of what he cannot really explain and especially check. By not closing the door to knowledge, the only one that is worth it ultimately, he prepares for a transition that will enable him to get over the hurdle easily and to open up to knowledge."
