Whispers from The Brighter World
A Third Revelation

Sunday, March 31, 2002 - 10:00 a.m.

Don't worry; we are here, in spite of the time change [to daylight saving time] that has failed a little for you. Men are whimsical in this aspect too. According to them, these kinds of practices are meant to promote the economy of the country. They chose to ignore that a good number of human beings are unsettled by them. Man won't let a paradox stop him; profit matters above all, more than his own balance. Our contacts will thus adapt to the situation. You know that for us time and place do not matter. Even if you were on another planet we would be able to communicate. For you, humans, it is important to have a well-balanced life, and to comply with precise schedules in your practices, in all areas; we insist on this point. The biological clock is one of the reasons for this, but there are many others, particularly with relation to the vibratory density in which you move. Try, as much as possible, to conform to a regular observation of this aspect of life and to adopt some regularity in your practices, which will help you to keep a good balance. From the infinitely great to the infinitely small, all living things are subjected to regularity and absolute precision of movement."
