Whispers from The Brighter World
A Third Revelation

Friday, May 17, 2002 - 8:00 a.m.

We understand that sometimes you can have doubts about yourself and your work, which is far from being accepted by all your fellow men; but what matters is that you do it. Nobody can be forced to believe in God, or in any other thing. A human being creates barriers for himself. When he cannot see or cannot perceive things one way or the other, everything becomes suspect to him. You see how you, too, react in some circumstances. You have reliable people around you, convinced of the veracity of our work; everything is therefore in place to help you to overcome these momentary states of soul – blessedly. Human nature, taking into account its limitations, is confronted with disconcerting reactions. It would like to believe in what is called irrational; but there is so much trickery around this word that most of the time it finds it disconcerting. Never mind: in the current state of evolution on this Earth, things cannot be changed; one has to put up with it. Very fortunately, many of our candidates will benefit from these messages, putting aside inappropriate doubts. This special teaching will be a milestone in the open-mindedness of people who may actually want to accept it."
