Whispers from The Brighter World
A Third Revelation

Sunday, May 26, 2002 - 8:00 a.m.

et your heart calm down, and come into this blessed place where we can have dialogue for a moment to find quietness. Each day, it goes like that: our vibrations are tuned with yours and you manage to receive us; isn't it a grace?

"In spite of external turbulences and the various states through which you are going, we pull off this feat. Our two worlds are close to each other, more than humans believe. Distances as conceived by them are distorted by illusory measurements. The universe is vibration; only this kind of density matters, which creates the difference between the various elements that make it up. Earthmen did not seize this difference from their theories. Not all of them are wrong. Based on a statement of fact they deem logical, their reasoning holds together. True knowledge would leave them astounded. They should review everything and set out again on other bases. That will happen; the moment has come when reality will unfold before their dazzled eyes. Their level of consciousness aligned with this fact will allow them a real approach to the cosmic phenomena. Evolution takes place slowly and starts in the secrecy of hearts."
