My dear son,

"The evaluation of your action is very good. We can only be delighted with the results obtained. You have gone exploring all these messages that time accumulated. They will probably require much more time to be appreciated, as they should be, by a wide audience. In the coming months, you will have the opportunity to judge. They will be forwarded to you progressively, their translation will continue according to possibilities; our people of goodwill are busy working to satisfy you. Our scribe is always ready to get down to work. Love—that you both nurse for me—is touching. Your songs are complementary and come up to me, forming a celestial concert. We all here appreciate this harmony, which delights our hearts.

"Continue to fight, my son, for the love of us. You consolidate the foundations of the building, which our Mission represents. You give it its entire prestigious image, and the power of your action keeps on producing the best results. We support you in all. Disappointments are inevitable, but the positive aspect of work is important, which must motivate you. You will soon have the necessary supports to make your job easier. You are not alone; you know it but it takes time for elements that will help you structure what exists to take place.

"Be confident, everything is planned for your good and that of our Great Work. Your action will mark it forever. We can only support you and congratulate you. Be blessed, my dear son, our hearts unite to glorify yours."
