Whispers from The Brighter World
A Third Revelation

Friday, October 4, 2002 - 10:00 a.m.

You should realise that you are preparing your future far from this world, which is limited in its capabilities for understanding. Humans have blinkers; they advance, convinced of their superiority, full of themselves, whereas they are so small in the scale of the universe. They live with this idea that they can conquer other planets, lay down the law, whereas they are not able to resolve their own problems, to live in peace without harming their fellow creatures in any way. Where is man's superiority in what results from this assessment? What is good in humanity was transmitted to it by beings inspired to come to its assistance and not by its own doing. It glorifies itself for its knowledge and its achievements, which it benefits from without being truly the instigator thereof. Time will come when all will come out into the open, and when humility will be the thing done among men. They will have to turn to true values and recognise their limitations. It will take a long time for them to say mea culpa honestly. This race has everything to conquer in terms of good; may God see to it to help them, by opening their eyes."
