Whispers from The Brighter World
A Third Revelation

Monday, October 14, 2002 - 10:00 a.m.

These messages will hurt some people, but progress requires daring acts. To advance in knowledge, humans need to be pushed in their way of thinking. We should not dwell on such considerations. Future times will clarify the situation with respect to the way these pages were written. The main thing, currently, is that they exist. They will have their place in our teaching, and will be at the disposal of those who will be interested. The time will come when all the manifestations emanating from beyond will become ordinary, and will be understood by the multitude who will have progressed and be able to discern the veracity of the sources. By force of circumstances, these concepts will become obvious for the majority of individuals, after being given many pieces of evidence on a phenomenon that had disconcerted them. We are not yet there; but the world is moving towards greater open-mindedness. It is high time that humanity left the state of obscurantism in which it takes pleasure, hindered as they are by false theories and dogmas belonging to a bygone era. We are working so that the new era being established in this world will be the age of enlightenment, tolerance and love."
