Beloved Master
Revered Babuji Maharaj

Whispers from The Brighter World

Sunday, April 25, 1999 – 8:00 a.m.

Raise your thought above your small life and rejoice.

See the beneficial waves of love spread from the Master's heart over the Earth, like a stone thrown into water produces circular ripples, which grow larger and larger and move far away from the starting point.

Thus, an important spiritual work also produces waves that go very far on the surface of the Earth. It is like a refreshing shower, which will not change human beings in a definitive way, but they will feel unburdened and strengthened.

These are moments of grace that allow human beings to catch their breath.

Whatever is good for humanity cannot be lost, it is already a small step for its evolution.
