Whispers from The Brighter World
A Fourth Revelation

Wednesday, January 8, 2003 - 10:00 a.m.

The beings of light strive to overpower dark forces that prevail in this world – they are powerful, whatever their names. From time immemorial, the two aspects have co-existed; this duality is specific to the Earth.

"Part of humanity would like to actually depart from it and the other one delights in this gloomy energy. Thus is the situation at the dawn of this century. Our way represents humanity's opportunity to see the light; it attracts souls ready for higher planes. Other ways also work towards the same goal; great missioned people are working, devoted to saving this planet under the aegis of Almighty God.

"The worlds are countless; the Earth is a small planet lost in the vastness surrounding it, a dot on the immense map of the universe. It nevertheless holds all the attention of the higher authorities that oversee its evolution. With the passing of the centuries, it was subjected to many opposing influences, which it will have to be freed from completely to make a fresh start. A new cycle is in the making; it should transform people's minds in the future. The foundations of a new system are being laid, which will be a determining factor in its opening towards another dimension, more suited to the coming new era. Many hearts feel it and are preparing for it. Even if they do not live long enough to witness it, they contribute to its development."
