Whispers from The Brighter World
A Fourth Revelation

Thursday, January 9, 2003 - 10:00 a.m.

Everything on the Earth moves slowly; such is its pace. Its laws are specific and established accordingly. We comply with them in our work and even in our contacts, which take place in a specific framework.

"You can observe around you that many people are opening out. The new times are taking shape with many individuals becoming aware of forces that are beyond them and their smallness in the face of this unknown which they start considering differently. People must get rid of all preconceived ideas, of misconceptions instilled into them at all levels. All that which they had believed until now reassured them. They fear the unknown, the inhabited worlds other than what they know, as well as the divine omnipotence, which some of them start to foresee. Their discoveries are not yet over; one day their entire narrow-minded world will collapse with all their certitudes. They will have to make a fresh start more in line with reality, and re-examine their lifestyle, in order to adapt it to the circumstances.

"Only spirituality will be able to save the world; this assertion is not exaggerated; for you who have been following us for a long time already, there is no doubt about it. Humanity, as we already said, is at a pivotal stage of its evolution; important work is being done to spare it the worst. May light finally dawn in the hearts and lead them on the way to salvation."
