Whispers from The Brighter World
A Fourth Revelation

Monday, January 20, 2003 - 10:00 a.m.

Thanks to your gifts, what you are experiencing is exceptional. You are surrounded by a certain number of people who believe in what you are doing and who appreciate it; what more can be needed? Let us continue this work together. One day it will be more widely recognised when the favourable moment arises. What matters is to advance in what we wish to transmit by this means, which will become common in the future when people, by force of circumstances, will be able to distinguish true from false. A prolific and serious body of literature has been made available to a large audience, which contributes to opening their eyes to a reality that cannot be negated indefinitely. In the face of events, a collective awareness will occur which will enlighten men on truths that for too long have been hidden and disparaged for the sole purpose of avoiding any challenge to the values that a great number of people accept and recognise.

"There is a time for everything. Let us continue on our road. One day, we will openly contribute a stone to the building of this overall awareness which we have just alluded to. Everything happens just at the right moment; humanity comes from afar, it rises slowly, as in creation.

"The events are not visible to men attached to appearances and who have misconceptions on phenomena which are beyond them. The seekers will end up understanding the essence that cannot be defined by scientific reasoning and irrelevant evidence. One day, everything will be called into question in all areas."
