Whispers from The Brighter World
A Fourth Revelation

Friday, April 11, 2003 - 10:00 a.m.

One should not fear to speak about the possibility of contacts with the beyond. Non-initiated people must get used to this idea and reconsider their way of thinking on this subject. The most reticent ones will have to reconsider their position; they will be provided with a great quantity of proof that will sweep away their doubts about this reality. Let us continue to work for future times when our contacts will be fully recognised in terms of their production of these many messages.

"When reading them, many will feel the truth therein as well as the authenticity of their format. Evolution on the Earth is very slow, given its specific vibration. It will nevertheless have to speed up: so has it been decided. This fact, as we have already said, will change the face of the world, since the entire creation will go through a stage of metamorphosis. So has its evolution been planned. It will go through phases of destruction: it is inevitable. The achievements of the new era will be based on different foundations more suited to the real progress it will bring. It does not matter whether this vision of the future is currently admitted or not; the destiny of this planet will take place only on the basis of these new foundations."
