Whispers from The Brighter World
A Fourth Revelation

Monday, May 5, 2003 - 10:00 a.m.

You know how to open this door that lets you see all the beauty of an 'elsewhere' which so many human beings are unaware of. They cannot access a whole world that escapes them because they are unable to see its utility. Only the material aspect of life is of interest to them and reassures them. They absolutely do not want to think that there is a means of giving meaning to this existence, the precariousness of which they aren't aware of. A big emotional shock can make them become aware of it, and lead them to think differently. The awakening then starts to occur in them, which could bring them to a desirable transformation.

"In this context, a great collective shock would be perhaps useful to change humanity and to make it evolve towards other spheres of comprehension. The result could be interesting, even if the success was not complete. What does the future have in store for this poor confused planet? You, our convinced aspirants, you know that you are passing through your time on Earth and that you have to work there for your elevation. We are helping you to this end in many ways, leading you to put into perspective the difficulties that you encounter by viewing them as necessary stages in your initiatory process. No life escapes ordeals; knowing that they are necessary for one's evolution is a comfort granted to those having gone beyond the stage of ignorance in this area. If they keep well in mind the precariousness of their lives, they will no longer see it from the same perspective and there is every hope of success concerning their spiritual evolution."
