A spiritual way like ours makes it possible to guide souls that are ready to rise up. It represents an effective means accessible to today's men who really want to take the trouble to make efforts to this end. Divine plans are taking shape in view of this: to see humanity reaching another level of consciousness, which will make it ready to grasp the great truths that currently escape it. Sahaj Marg is a big movement that will contribute more and more to preparing the spirits, enabling them to advance in the history of the Earth in terms of its evolution.

"It is not easy to imagine the future impact of our way and what it will represent for this world. It takes time for the magic of words to touch the spirits. The most known teachings on this planet took, in some way, centuries to reach the hearts. From time immemorial, the same phenomenon took place, but the source is running inexhaustibly as it is of a divine nature and it is making its way at all costs.

"The evolution that is dawning calls for other voices. They will make themselves heard, benefiting from the current means of communication through which each one has the possibility of being informed at home through books, and more and more also thanks to modern technology. This accessibility is as of now at the disposal of a great number of our brothers and it will keep on developing. Our way will not be outdone in this regard and it will carry the Masters' words very far to those who, one way or another, will seek it."
