Beloved Master
Revered Babuji Maharaj

Whispers from The Brighter World

Saturday, May 1, 1999 – 8:00 a.m.

Bear in mind that as your Master grows, the Mission grows, and you grow too.

You are in a movement of continuous expansion, which will not stop growing.

It is the force of attraction that is manifesting itself and increasing; it is irreversible.

It is a dynamic that may be beyond you, that we cannot demonstrate for you, but you are seeing the results. They will only intensify in the future.

At your level it makes no difference.

Go your way without worrying about all these cosmic rules.

The main thing is that you realise an important process is underway and you are part of it.

This spiritual movement will mark the coming century. You will have been part of the groundwork. The foundations are solid now; we will be able to continue by accelerating the principle so that the Mission reaches its full potential and continues on the same trajectory.

We will resume later, my daughter. Be happy to be on such a beautiful path.

Babuji
