Whispers from The Brighter World
A Fourth Revelation

Sunday, June 15, 2003 - 10:00 a.m.

How could the limitations of the physical body compare with the power of the spirit! It offers unlimited possibilities, which man in general is not aware of.

"This fact has created an insurmountable gap between human beings: on the one hand, those who believe in the power of the spirit in this world, and on the other hand the recalcitrant ones who cannot adhere to this point of view.

"Knowledge emerges very slowly, but it is no longer the prerogative of an elite trying to acquire it in a shroud of great mystery. Avant-garde ideas about the reality of the human body are nevertheless simply rejected by influential scientists. They have misconceptions about the reality of the human being and refuse to admit, in many countries, the fundamental principle of reincarnation and its implication for the reincarnated person. There is a two-tier knowledge here below and those who reject this reality cannot really progress.

"Religions played and are still playing a predominant role in this narrow-minded system of thought. Minds are opening very slowly. May science and true knowledge, going beyond the limitations of this world, merge one day for the good of humanity.

"We are working to this end; the opening is slow. Spiritual work makes men progress towards a more correct vision of things. So much work has to be done to prepare spirits for another dimension of knowledge. Through the cleaning process included in our system of approach to the Divine, our way is playing its role in the

saga of this new era which is working for the good of mankind, who will then be able to access a knowledge that would actually allow him to progress."
