Whispers from The Brighter World
A Fourth Revelation

Sunday, August 17, 2003 - 10:00 a.m.

The language barrier is a handicap; we overcome it by using this means of communication.

"These limitations belong to the world where you are living, whose vibration corresponds to its current level of development. That was not the case of very ancient civilisations using natural thought transference, still employed by some rare ethnic groups protected from the damaging effects of the current way of life, which they have escaped.

"The potential uses of the human brain, as actually identified, are limited compared to the true potential that exists. This world is subjected to strict laws which man cannot decode. It must yield to the rules that correspond to a collective karma. It should evolve in the new era that is likely to make this civilisation advance.

"The future will tell; in the end, only God is in control of the destiny of the world.

"Our way will be characterised by these messages of a special nature which will one day be made available to our abhyasi brothers.

"This uniqueness will be at the forefront of an integrated way of life and thinking representing future times. Some of our books are not currently well understood. When the time comes, things will be different and they will be read with interest.

"Openheartedness is of primary importance in this matter; true perception comes from it. Nothing can be imposed in this area, where the intelligence quotient is inoperative in grasping what only the inner being is able to feel.

"The work suggested in our way prepares our aspirants to receive truths that are still beyond them today.

"May the age of enlightenment be established and prevail on a permanent basis on Earth."
