Whispers from The Brighter World
A Fourth Revelation

Sunday, September 7, 2003 - 10:00 a.m.

Live every moment to the full, my child. Leave your reasonings aside, they are useless here. Surrender to this peace which your heart needs. You know that through its specific channels it is not isolated. Its explorations at other levels of consciousness are full of specific contacts, meeting its aspirations.

"You are visited every day, and through this channel, we can give a teaching which is important. Man must become aware of the vibratory world which he is part of. All here is vibration. He himself is subjected to this fundamental rule determining 'life' in this world, which on the other hand remains ignored by those who believe they know everything about the environment which they come from.

"Science is on the fringes of the truth. Researchers are not going in the right direction. These remarks may seem unfounded to people who believe they are superior because they did some studies that confine them to a formalist teaching.

"The humanity of tomorrow, evolving towards knowledge, will not disdainfully reject a healthy approach to realities. Great mystics of the past, who belonged to certain secret initiatory ways, benefited from the teachings about the laws of life that are not recognised by those who want to impose their own principles. There is so much left before the world can be liberated from its ignorance. Mistrust is so big regarding the phenomena which they cannot explain, that they restrict themselves to ignorance of the truth. May future times shake up these erroneous principles."
