Never lose hope in life, in your life, which is being built day by day, until the end. You are in a spiritual way which suits you, where you give of your best and the idea of the 'beyond' does not worry you, contrary to many human beings who see no way out to their life on this Earth. Between what they believe as being actual, and the reality of their incarnation, there exists a shift difficult to understand, in a world claiming to be exceptionally advanced.

'The beliefs that have been promoted for centuries maintain humanity in the ignorance of its own reality. To believe in God does not imply stagnating in obscurantism and ignorance about His laws. The revealed truth can only help man mould himself and surpass himself as a human being. The purpose of keeping him in ignorance is to better dominate him, and to inculcate in him principles some of which may help him, but on the whole slow down his evolution.

'Thanks to a regular practice, many of our aspirants make progress in terms of broadmindedness, and are released little by little from the restrictive concepts inculcated in them. A spiritual process--free from taboos and beliefs, which were irrelevant even at the dawn of this century--determining for humanity, should help it in its forthcoming transformation. God is great, all will be as per His will and our action is in line with that. Our system will be more and more an integral part of this great framework revealing future times."
