Whispers from The Brighter World
A Fourth Revelation

Tuesday, November 4, 2003 - 10:00 a.m.

Your heart, surrendered and generous, is taking part in these contacts with gratitude: that was one of the reasons for this choice. Its perseverance and the mark of three thousand messages, which will soon be reached, had to be underlined. These writings will not change the face of the world, but they will contribute to the great movement aiming to enlighten humanity and to make it become aware of the ways it must follow.

"At each great turning point in its history, new voices could be heard that aimed to guide it. They were adapted to the prevailing spirit and could be understood by the greatest number. The new era will be full of revelations, each being more surprising than the other to man dumbfounded by so many discoveries. He will have to find support for all this in a teaching at his disposal, and which will provide him with new elements capable of supporting his new knowledge.

"He will try, setting out again from scratch, to develop a new image of life on this Earth, as well as its ensuing continuation. Our way will be at the heart of a system meant to answer their questionings.

"All is being set up slowly until its completion, in compliance with laws prevailing in this world. The divine projectors are being oriented towards this planet that is reaching a decisive point of its history. How will it get past this point! An important preparatory work has yet to be done, to which our way has to contribute. Will man be able to take a new look at himself and get rid of his dross in time? That is the question!

"Let us work to that end, time and again, with determination and confidence in the great divine plans, which should literally destabilise our brothers. May they be receptive to these voices that can be heard above a whole set of knowledge to which they cling for fear of the unknown. Our blessings are directed to one and all."
