Whispers from The Brighter World
A Fifth Revelation

Thursday, January 22, 2004 – 10:00 a.m.

It is all movement and change on the Earth; this, at least, is common to the entire creation. No form of life escapes this principle, which is acknowledged by all. On this issue, we are not telling our readers anything new.

"For many people, whatever is not under the control of their senses is not conceivable, whereas all the principles of life emanate from the same approach, which exceeds the current framework of knowledge. We don't wish to delve into these considerations here.

"An advanced esoteric teaching is not included in the current standards of our way. With time, our way will adapt to men's broadmindedness and then we will provide them with the necessary elements for their progress. Our aspirants have yet a lot to do: they must progress and divest themselves of an excessive ego. Advancing in humility prepares them for the future destiny of humanity.

"A tremendous work remains to be done on this aspect; one has only to observe the behaviour of some people to notice it. The conditions of all must evolve; we are working to that end without the benefit of appropriate and effective assistance. May our abhyasis become aware of these weaknesses; doing so will help them in their work, however diligent it may be.

"The ascent is long and difficult; we cannot deny it, but what is at stake is important. The many brothers who are following us have understood it perfectly and are striving as well as possible to reach the goal. It is a long and difficult endeavour. We offer them, shall we say, a certain guarantee in the fulfilment of their hopes.

"Let us all continue to work accordingly. Only effort can pay off in this matter. Our comments can seem simplistic to the most 'erudite' people; yet they befit the situation and are not meant to comply with stylistic effects."
