Whispers from The Brighter World
A Fifth Revelation

Tuesday, February 24, 2004 – 10:00 a.m.

To human beings, reality is what they can perceive with their senses. Many of them react accordingly, by rejecting any possibility of approaching other existing phenomena. Thus, by choice, they limit themselves, denying what exists.

"We cannot go against such behaviours. Among our aspirants, another state of mind exists for the benefit of all. Spiritual practice fosters openness to phenomena not yet recognised by the majority and this attitude will grow, bolstered by striking events that are certain to occur.

"Our way is distinctive at the dawn of the new era; men who refer to it in this way do not know how right they are. It will bring about its share of events that will be quite astounding for all the beings still living on this planet. Our brothers are advised to familiarise themselves immediately with what is still considered by them as a novelty; they would thus prepare the future by adjusting to realities that will not be denied eternally.

"For the majority, communicating with 'the Spirits' still remains pure fantasy. This process is making its way into the minds of most of our brothers. Who better than they to prepare these future times by contributing to the understanding of what is still currently ignored! The new era will break taboos in many other aspects. Otherwise, where would novelty lie? What many wish for with all their heart will take place for the good of men and their evolution, according to our foundations.

"Let us work accordingly with faith and love; the divine power will provide for it."
