By disregarding the pains your body is experiencing and coming towards us, your heart is being put in osmosis with the divine source, which soothes it. Your priority is service. So too are our faithful aspirants, who are devoted to the role they agreed to play within our Mission; we appreciate that. All manifestations of goodwill are welcome. On this aspect also it offers many opportunities, according to the competences of each one. To grow and stand stronger, it needs everyone; tasks are all equally important. When carried out for the love of the Master, they take on a more important meaning.

"The least action made out of love is full of grace; in such cases, the heart proclaims its surrender and its availability. Many of our brothers have understood it for a long time; that is how great achievements take place, being conceived and inspired divinely, thanks to the goodwill of everybody, each one getting involved according to his capabilities. The meeting point of our brothers wherever it may be in the world, for as long as the objective is to practise in groups, is a point of light attracting the divine graces. They will keep developing with time, creating an increasingly dense network, strengthening the hearts in their faith and showing them the way to go. Positive energies attract each other, strengthened by the work of the Master, which reinforces the motivations.

"Everything takes place with time and develops by divine will, according to His plans. May our brothers persevere in their action and put in a lot of efforts on all levels, thus fostering the development of our Mission, for the good of all."
