Whispers from The Brighter World

A Fifth Revelation

Wednesday, June 16, 2004 – 10:00 a.m.

This planet is being harmed by men in an alarming way. Nothing stops them in their inventions, which are allegedly intended for their well-being, but are leading them to their ruin.

"Physically, they suffer from unexplained evils that are unsettling to them, one of which is electromagnetic pollution. The picture is black on this point. Under the pretence of comfort, humans are subjected to polluting and destructive systems, which they cannot imagine since those who understand about this fail to be heard. In this context, it is not easy for them to keep a satisfactory balance of their nerves; many harmful effects end up disturbing them.

"More than ever, keeping a space within where one can find oneself, as far as one's true nature is concerned, is a divine gift. Far from the multiple aggressions of this world, there is an oasis of purity and beauty, when it is searched for as such.

"From time immemorial, man is made to follow that process, the call of the soul being impossible to circumvent. Our aspirants have understood it as their lives, being centred on this objective, follow the desired path. This thirst of the soul for being united with Divinity is inextinguishable; our way applies itself to that by supporting their process. May they all reach the goal without weakening; our blessings accompany them."
