On such happy occasions for our Mission, it is caught as a whole by a greater vibratory movement than usual. Very beneficial energies flowing from the heart of its Master merge with ours, that complimentarity producing a very positive impact on all our aspirants.

"This year, a special acknowledgement is being made: it has reached in the annals a new stature, as was already indicated previously. It is good to insist on happy occasions concerning this Mission, which are especially dear to our heart. Its expansion is programmed like that; it is beginning a long cycle that is far from coming to an end. It is part and parcel of the advent of a new era in which humanity should eventually find its way: that of the spirit in priority, managing to remove the blackness of the world. Such a change is prepared well ahead of time. It is foreseen in the context of large-scale upheavals going well beyond this planet, whose strategy we cannot unveil for the time being. In the current context, man has all freedom to progress, this being essential to him. Within our Mission, conditions are presently very favourable. As humanity stands at a pivotal period in its history, a unique opportunity is granted to seekers to rise towards realization.

"May all our brothers and sisters, convinced of this necessity, practise with fervour and faith in their Master and in the system being suggested. Special blessings are being bestowed on them, fostering communion on this occasion."
