*Wednesday, November 3, 2004 – 10:00 a.m.*

*Our undertakings advance at the pace of this world, nevertheless they progress in accordance with our wishes. Humanity is moving towards its ultimate goal, in spite of how it appears today. It must run its course in its present spirit in order to spring up again from what it was, into another form in the future. We insist on this point, which to us is of the utmost importance.*

*The higher powers prepare those who want to listen and who vaguely feel within themselves all that we put forth in these comments. This civilisation has reached such excesses, unprecedented in the history of this world, that we must warn our brothers and sisters against its misdeeds which go well beyond all the forms of pollution.*

*Our role lies only on the spiritual level, through work that allows beings to progress, to purify themselves until they regain a satisfactory condition. Then the doors of knowledge and renewal open, at an appropriate level of consciousness. Our brothers and sisters aspire for this, and we are doing everything possible to lift them towards the final goal.*

*The benefits of our work filter through people's hearts; the harvest looks promising. Its fruits will in turn continue to produce, leaving profound traces in this world and helping it get over the perilous hurdle to the new era.*
