Whispers from The Brighter World

A Fifth Revelation

Monday, January 10, 2005 – 10:00 a.m.

Life is vibration; that knowledge remains to be deepened on the Earth. Absolutely everything is subject to this principle. This applies most especially to the human body. A serious approach to this reality would resolve a good number of health problems. Science neglects this truth; it follows the direction it has set for itself without departing from it, thus missing a truth known for a long time.

"Certain esoteric movements base their work on highly realistic principles in this area; they possess advanced keys, waiting for the moment of revelation. Humanity is advancing slowly, at the pace of the Earth's vibrations. Only a process of acceleration will allow a breakthrough in the deepening of the divine laws, ignored by the majority of men.

"The human race is weakening. Wandering more and more from a healthy life, it no longer respects the natural rhythms of life. It gets drunk on noise; it feeds on denatured food and is polluted on all levels, causing dysfunctions that disturb its physical and mental balance.

"For his survival, man will have to return to normality, to the respect of the divine laws which he ignores, by centring his existence on values where spirituality will prevail. To God nothing is impossible. He takes His time, but He strikes strongly, when the moment has come, to stop a process going against nature.

This planet is not alone in the universe. It harms a very precise vibratory balance and it will therefore be necessary sooner or later, to stop it in its madness."
