Whispers from The Brighter World

A Fifth Revelation

Tuesday, January 18, 2005 – 10:00 a.m.

The contents of these messages are evolving; it is necessary to adapt to them and accept their unconventional and yet realistic premises. Those who are open-minded will accept them, admitting the principle of multiple lives – including simultaneous lives, on other levels of consciousness.

"Life is one and manifold – man cannot imagine to what extent! Well established in a physical body, he believes in his individuality, whereas he is actually a replica of his subtle bodies, which manifest in various ways.

"This experience on Earth is an important stage in the entity's evolution. The required means are at its disposal: it only needs to make the most of them, while accepting the difficulties that come with it by considering them as necessary. Thanks to the wisdom acquired during its many incarnations, it can be selective and adapt to circumstances, seeing them as a manifestation of the Divine.

"A life experience, considered from this angle, is an enlightening one: it allows a being to grow, giving it access to other patterns of life.

"The path to eternal bliss, as promised in various religions, is a long one. It is not limited to only one life on Earth. Other opportunities are given, so that all the facets of the cosmic being may harmonize and merge into the divine and sublime energy.

"All that man imagines about his future life, far from his reference points in this world, is likely to deeply amaze him. He will need to reconsider the question with new parameters, and then will begin his quest for true knowledge, beyond the reach of the world of men."
