Whispers from The Brighter World

A Fifth Revelation

Thursday, January 20, 2005 – 10:00 a.m.

Our brothers and sisters must get accustomed to this mode of communication before we can go further in this revelation. It is necessary to take into account all of our aspirants; those who have gone further in knowledge will understand.

"To succeed in creating unity among all is the goal of our teaching. In the future, humanity will advance globally and our way will conform to the new spirit of the times. We cannot currently hasten anything. The principle of communication with higher levels must be admitted by all, thus marking a milestone in human understanding.

"We cannot sit back and stay within the limits where we know we do not disturb. To evolve is to also accept a reality hitherto concealed from the greatest number. Many other phenomena of the future will be revealed; they will be more surprising for the common run of people than a communication like the one we are offering.

"Waiting for the new era implies a necessary open-mindedness in order to not miss important aspects. Choices must be made on this aspect and they will be decisive for each one of our brothers. Opening up to life, to its truth hidden for such a long time, shows a true intention of advancing and rising to a higher level of understanding.

"All will be done in our way in due course before the advent of a more general movement so that it will not completely surprise those of our brothers who have trusted us."
